

## To Develop an E-learning Application Using TDD with TestNG.

### Algorithm-

Step 1:-Create a maven project.

Step 2:- Write a dependencies to use TestNG and Selenium.

Step 3:-Create a package SimplilearnApp.

Step 4:-Create a class HomepageTest.java for opening the website and course list.

Step 5:-Create a class BaseTest.java for using the test the program.

Step 6:- Execute your tests using TestNG in Eclipse or via Maven commands (**`mvn clean test`**). Ensure that the tests pass successfully...

Step 7:-Crare a repository in the GitHub.

Step 8:- Push the all file in the repository.
